Message...

“Success does not lie in results, but in efforts. Being the best is not important, doing the best is all that matters.”

Education is not merely attainment of facts but also of values which help us improve the different facets of mankind. A pivotal role of education lies in shaping the personality of a child into a healthy mind and happy soul, who is not only equipped with 21st century skills and aptitude required for academic excellence but helping him face the challenges of life in a balanced and harmonious way. Therefore, the system of education should work as a catalyst in making each child a balanced human being having his core strengths embedded in the learning experiences emanating from our rich socio-cultural roots.

Children are highly impressionable during school years and at DPSGI we inspire in our students a love for learning that lasts a lifetime. The child undergoes varied changes at different stages of life. In the initial stage, children are brimming with immense energy, which is channelized through a plethora of activities. Harnessing the dormant and often latent potential of every child, and empowering him or her with the knowledge beyond classroom teaching, has been our constant endeavor towards their overall development.

We enterprise to map academic excellence with a good human value system, which in myriad ways is ingrained in the culture of the school. To achieve this, we strongly feel that a paradigm shift in the minds of all stake holders should take place so that when the school becomes the hub to initiate and formalize education it has its tenets enshrined in a good value system; the extension of which is thereby taken home where it is further strengthened. And our commitment to such education will always persist in all our endeavors.

My heartiest congratulations to all the high achievers.

Anita Sethi
Principal
